ADG hires two for growing Mississippi office *Expansion comes during Silver Anniversary year in business*

JACKSON, MS – Airport Development Group, Inc. (ADG) announces the hiring of an engineer and environmental specialist to its Jackson, MS office in response to growing client demand across the state and the region as ADG celebrates its silver anniversary year of serving the aviation industry.

ADG, founded in 1984, is dedicated solely to the aviation industry offering planning, design, engineering and marketing/public relations services to general aviation and commercial service airports nationwide. The Jackson office opened in October 2004.

James E. Malone, P.E., is 2003 graduate of The University of Tennessee at Martin with a bachelor's degree in civil engineering. Malone has directed civil and aviation-related engineering projects in Alabama, Tennessee and Indiana. He has participated in client projects for Wal Mart and FedEx.

Gary Behrens has more than 26 years experience in environmental project management, including significant expertise in support of the National Environmental Policy Act (NEPA) environmental assessments, wetland delineation, mitigation planning, and permitting for U.S. Army Corps of Engineers permits. Behrens holds a bachelor's degree in environmental biology from Auburn University, Montgomery, AL, with additional graduate studies at Auburn.

“We’re excited to undertake this staff expansion during a period of national economic unrest,” explained Mike Corkern, associate principal and director of the Jackson office. “Our current customers are busy with enhancing their airports, and our national reputation for service and quality is creating new business opportunities across the South.”

In addition to the Jackson office, ADG serves the nation's airports from its headquarters in Denver, CO, and offices in Lawrence, KS and Ogden, UT. ADG's team approach to project management at each airport it serves across the country has resulted in long-standing partnerships and award-winning projects.

For more information or to contact ADG, go to www.adgairports.com.
